

# HopAid® Antifoam

**BARTH-HAAS GROUP**  
FOR YOUR SUCCESS

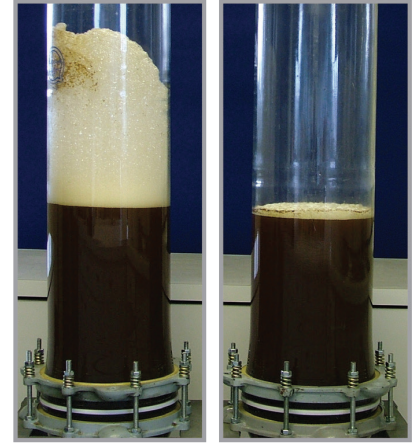

Increase your fermenter capacity using the natural power of hops

Increase your fermenter output by up to 20% using a natural hop derived alternative to synthetic antifoam products. Our patented technology uses lipid fractions present in hops to produce a product suitable for all types of brewers.

- **Efficient:** Improves fermenter capacity by up to 20%
- **Cost Effective:** Lowers the unit cost of production
- **Natural:** 100% natural product made from hops
- **Maintains Quality:** No negative effect on flavour or beer foam
- **Easy to Use:** Works brilliantly dosed directly into cold wort.

**Do the maths...** If you brewed **200hL** using HopAid® AntiFoam you will be able to increase output by up to an **additional 40hL...**

...All of which would have been foam but is now **100% beer** that you can **sell** to your customers.

The fermenter on the right has been dosed with HopAid® Antifoam resulting in greatly reduced fermenter foam which releases extra capacity.

## WE'LL HELP YOU GET STARTED

To help you get the best from this product we are happy to provide samples and support in conducting your own trials.

To begin trials or for more information on HopAid® Antifoam please contact your Hops Connect contact!
